

METROPOLITAN WASHINGTON AIRPORTS AUTHORITY

SOLICITATION NO. 1-08-B220

**LCD Baggage Carousel Monitors, Terminal A
Ronald Reagan Washington National Airport**

August 28, 2008

QUESTION AND ANSWER RESPONSE #1

1. Question: For the 40" size measure of LCD monitor, will 42" or 37" be accept with matching spec requirements? What are the spec requirements for resolution, contrast ration, input sources – VGA, DVI, S-Video, USB, and HDMI? Will analog and digital TV tuner be needed?

Response: No, 42" is too big and 37" would throw off the symmetry, so they both are not acceptable. The specification requirements are as noted in the specifications – See Attachment 01 to the Request for Quotations. An analog or digital tuner is not required.
